

What We Offer, What It Involves, What You Get

Every NexHSE Africa service below is built around a real business outcome, not just a technical activity.

SERVICE	WHAT IT IS	THE OUTCOME
OSH — TRAINING & CAPACITY BUILDING		
OSH Training	Builds core hazard awareness and legal compliance org-wide.	<i>Your workforce spots and stops hazards before they become incidents.</i>
Fire Safety Training	Prevention, response and evacuation skills, including fire marshals.	<i>Your building passes fire inspections — and your team doesn't freeze in a real fire.</i>
First Aid Training	Certified first aider and refresher training aligned to the 2024 Regulations.	<i>A trained responder is on-site the moment an injury happens.</i>
Work at Height & Confined Space Training	Specialised competence for high-risk access, fall protection and entry.	<i>High-risk tasks are done only by people actually qualified to do them.</i>
Emergency Response Training	Builds organisational readiness to respond to workplace emergencies.	<i>Your team reacts fast and correctly — not in panic — when something goes wrong.</i>
Training on Alcohol & Drug Abuse	Awareness training and workplace policy support for substance-related risk.	<i>Substance-related incidents get prevented, not just punished after the fact.</i>
PPE Training	Correct selection, fitting and use of personal protective equipment.	<i>PPE actually protects — because it's worn and used correctly.</i>
ASSESSMENTS, AUDITS & POLICY		
Risk Assessments	Identifies and controls workplace hazards before they cause harm.	<i>You know your real exposure before an incident forces you to find out.</i>
Health & Safety Audits	Independent verification against statutory and ISO 45001 standards.	<i>You walk into any inspection or lender review with evidence, not excuses.</i>
Fire Safety Inspections & Audits	Verifies fire controls against the Fire Risk Reduction Rules, 2007.	<i>No surprises when the fire inspector shows up.</i>
Development of OSH Policies	Tailored policy frameworks built for your operation.	<i>A safety management system that actually functions — not a binder on a shelf.</i>
Asbestos Containing Materials (ACM) Surveys	Identification and risk management of legacy asbestos hazards.	<i>You know where the risk is before it becomes a lawsuit or a stalled demolition.</i>
SPECIALISED SERVICES		
Chemical & Mechanical Safety	Safe handling, storage and operation around hazards and machinery.	<i>Fewer chemical-exposure and machinery incidents on your site.</i>
Disaster Preparedness & Management	Structured planning and readiness for large-scale or catastrophic events.	<i>Your organisation has a plan before the crisis, not during it.</i>
Construction Site Safety Management & Monitoring	On-site HSE oversight and supervision through the project lifecycle.	<i>Continuous safety coverage without hiring a full-time HSE officer.</i>
EQUIPMENT SUPPLY		
Firefighting Equipment Supply & Maintenance	Reliable, inspected firefighting equipment supply and upkeep.	<i>Equipment works the one time it actually matters.</i>
PPE Supply	Quality PPE supplied alongside the training to use it correctly.	<i>Staff are equipped and know how to use exactly what they're given.</i>
First Aid Appliances Supply	Fully stocked, compliant first aid kits and station equipment.	<i>No excuse for an empty first aid box when it's needed most.</i>
ENVIRONMENTAL MANAGEMENT		
Environmental Impact Assessment & Audits	Assesses and verifies environmental compliance and impact management.	<i>Your project clears NEMA approval without a redesign-and-resubmit cycle.</i>
Environmental Education (Training)	Builds environmental awareness and responsibility across your workforce.	<i>Your team makes environmentally sound decisions without being told twice.</i>
Environmental Policies & Management Plans	Structured frameworks that guide consistent environmental performance.	<i>Consistent environmental practice — not ad hoc decisions per site.</i>
Environmental Management Systems	Systems-based approach to continual environmental improvement.	<i>Environmental performance that improves year over year, not just once.</i>
Waste Management	Safe, compliant handling, storage and disposal of waste streams.	<i>No regulatory exposure from how your waste is handled.</i>
Effluent & Emissions Management	Discharge control planning and monitoring for liquid and airborne emissions.	<i>Emissions stay within legal limits — verifiably.</i>
